

## **SOFTSKILLS ASSIGNMENT 2**

### **Module 2: Technology**

As I am in the field of web designing and development I need to enhance my designing and development skills.

To upgrade my technical skills in the field of Web Designing:

- I will review many new designs of the good designers and try to imbibe new creative ideas.
- Some of the tools that I will learn to upgrade my designing skills and creativity are Bootstrap, WebFlow, Canva, Shopify, Wix, etc.

Now to upgrade my skills in web development:

- I will review the codes written by good developers.
- I will try to make open source projects to enhance my coding skills.
- I will try to learn some advance tools or libraries for web development For e.g. Reactjs, Angular, Vue.js, etc.

I am pursuing a detailed course of learning the webFlow tool from the youtube channel name WebFlow.

My approach to continuous learning and professional development will be getting updated regularly about my field from many different News letters, Research articles, Tech youTube channels and learning many different tools that can ease and fasten my work and enhance my productivity.
